

**PAJDAKOV**

FOOD PROCESSING INDUSTRY  
since 1997

"Pajdakov" is a private company founded in 1989. However, the factory for production and processing of vegetables and fruits started working in 1997, becoming the first factory of that kind in Macedonia. The products of "Pajdakov" are produced strictly from fresh vegetables and fruits, grown especially for our needs in ecologically clean environment. The region where the factory is located and where the vegetables and the fruits are being grown, Gevgelija, is characterized with over 300 sunny days yearly, which guarantees their high quality and good flavour. Since the foundation of the factory, our determination is to produce products with top quality and by highest hygiene standards in order to satisfy the taste and the needs of our consumers.

"Pajdakov" is a family company and our second home. Therefore, our products are being produced according to the home traditional recipes by which we keep the tradition of our ancestors. For this reason, the whole family Pajdakov is engaged in the company "Pajdakov". Together we monitor the production process, we control the quality, and when the jars with tasty food for winter are full, we strive to distribute them to the market's shelves near you on time. The assortment of "Pajdakov" is divided into two categories: standard and home. The spectrum of articles is wide and it increases each day. The quality and the flavour of the food we produce are guaranteed with certificates for international standards that the factory owns: ISO 9001 and ISO 22.000.

Our quality is being recognized not only by the home consumers, but also by the consumers in Europe, Australia and USA where we export our products.
